

Nada Gligorov, PhD is Director of Graduate Studies at the Alden March Bioethics Institute and Associate Professor in the Bioethics Institute.

She received her PhD in Philosophy from the Graduate Center of The City University of New York. Prior to joining AMBI, she was Associate Professor of Medical Education at the Icahn School of Medicine at Mount Sinai. The primary focus of her scholarly work is the examination of the interaction between commonsense and scientific theories. She is the author of a monograph titled *Neuroethics and the Scientific Revision of Common Sense* (Studies in Brain and Mind, Springer, 2016). She is also the co-editor of the book *The Human Microbiome: Ethical, Legal and Social Concerns* (Oxford University Press, 2013). Dr. Gligorov has published in the *Hastings Center Report*, *AJOB-Neuroscience*, *Neuroethics*, and *The Monist*. Her current scholarly efforts are primarily focused on whether brain death is biological death and the role of cognitive and emotional processes in pain perception.
